

ANE 1003

NON-EMULSIFIER

Application

ANE 1003 is used as a non-emulsifier in acid or water base stimulation treatments. It is compatible with all acid corrosion inhibitors in a variety of hydrochloric acid mixtures. Non-emulsifier is specifically designed to treat and/or prevent acid-in-oil and water-in-oil emulsion which commonly occur during well stimulation. Normal concentration for this additive is 1-30 gal/Mgal of acid solution (0.1 to 3 volume percent).

Physical and chemical properties

Item	Description	Properties
1	Physical	Light yellow Liquid
2	Odor	Specific
3	Solubility in water	Soluble

Features

ANE 1003 is used in all types of well stimulation treatment. This additive disperses well in 15-28% hydrochloric acid (HCl), spent HCl, and other water based fluids.

Packaging

Drum: 55 gal
