

# Solvent (Mutual Solvent)

•

## Application

**(ACMUS)** is a solution that is mainly used ahead of cement slurries to separate them from oil-based drilling mud; however, it can also be used with water-based drilling mud. In addition, **(ACMUS)** helps wash residual mud from the formation and pipe and renders the surfaces water-wet. **(ACMUS)** will aid in thinning the mud which will reduce the chances of channeling by following fluids.

It helps to achieve good mud removal and bonding of the cement to the pipe and formation.

## Physical and Chemical Properties

Item	Physical and Chemical Properties	
1	Appearance	Colorless
2	Odor	Alcohol like
3	Solubility	Soluble

## Safety Precautions

It is an irritant. Avoid inhalation. It is recommended to wear a mask and goggles during handling.

## packaging

It is available in 55 GAL. drums
